Comments: I do not want to have Yucca Mountain as a storage for the nations nuclear waste. I do not want to have Yucca Mountain as a storage for the nations nuclear waste. Yucca Mountain is only 100 miles from Las Vegas which is one of the fastest growing cities in the nation. We have over 1 million people in Las Vegas alone. You want to transport it thru our city to get to Yucca. God forbid, but what if something terrible happens? What if we have and earthquake, or if a truck turned over or crashed. Can you say it is safe for our city. And now especially since the Sept. 11 attack, how can you protect us from a terrorist attack on Yucca Mountain? It would seem to be and ideal target for terrorists. If hit it would do mass destruction and completely destroy Las Vegas. This is my home and I want my child and all children of Las Vegas to be safe and so far I cannot see this being a practical site. Most of the state of Nevada is nothing more than empty desert. Why 100 miles from one of the fastest
